

LIVING ARTS SYSTEMS

14 April 2008

RE: Sponsorship of the 19th Annual Crestone Energy Fair held August 30th & 31st 2008, Crestone Town Park, Crestone, CO.

Dear Prospective Sponsor,

Depleting fossil fuels, rising energy costs, global warming, environmental degradation, potable water scarcity, food security. These are the issues that we face as a global community. With these challenges, however, we at Living Arts Systems believe there are tremendous opportunities to produce lasting solutions, jobs, and prosperity. The Crestone Energy Fair (CEF) is in its 19th year as a platform for demonstrating, educating, promoting, and celebrating sustainable solutions in the areas of water, food, housing, and energy. This year our theme is: ***"It's Not an Alternative Anymore."***

The Crestone Energy Fair has traditionally been a grass roots, home-grown event put on by passionate volunteers with sweat and grit. Living Arts Systems has now stepped up to the plate to bring the CEF through its twentieth year to ensure the Fair reaches and attracts a nation-wide audience while providing a unique and inspirational event. We want to support one of the longest running sustainability fairs in the country as it finds its place of leadership in the now prominent New Energy Economy.

We are pledging to exhibit high quality demonstrations in the traditional renewables such as solar, wind, and hydroelectric, etc. but also some of the new and upcoming energy technologies such as biomass gasification, algae propagation, biogas, and hydrogen applications. We will also showcase the very best indoor presentations from the most highly qualified and experienced folks in the renewable energy industry from Colorado and beyond.

We usually expect about 300-500 visitors per day (mostly from out of town) over the weekend where we have ongoing family activities, live music, and home cooked food. On Monday, we host the very popular CEF Home Tour where our community of natural builders open their homes of unique, natural, and high-performance designs to the public for guided tours.

With your generous sponsorship, Living Arts Systems will ensure the Crestone Energy Fair is firmly on the map as a long-standing hallmark of sustainable living and renewable energy. The future is ours.

Thank you for your time and consideration. If you are interested in a exhibiting a demonstration, presentation, or having a vending booth, please let us know as well.

Sincerely,

Nicholas Chambers
